(I hereby declare that the information stated in the application form is true, completed and correct to the best of my knowledge. I hereby abide by the rules and regulations of the SKLTSHU on the event of my admission.)

Signature of the applicant

Place:

Date:

Signature of the sponsoring authority

INTRODUCTION

Vegetables are integral part of a balanced diet and are considered as “protective foods” as they prevent several diseases. So in vegetable production scenario, area and production of vegetables in the state are always on the rise playing an important role in economic development. Diverse climatic conditions prevailing in different parts of the state offers ideal situations for cultivation of variety of vegetable crops ranging from tropical to temperate vegetables.

The present production is not sufficient to meet the requirements of 285g vegetable on an average per capita per day. Therefore, it is necessary that production of vegetables is to be increased at a much faster rate.

There exists a lot of scope for increasing yields in most of the vegetables by growing high yielding varieties / hybrids and adopting improved production technologies.

OBJECTIVE

To enlighten farmers with good agriculture practices along with recent trends in vegetable production.

COURSE CONTENT:

- ☞ Importance, scope and classification of vegetable crops.
- ☞ Soil management practices in vegetative growing.
- ☞ Nursery management practices in vegetable growing.
- ☞ Irrigation and fertigation management in vegetable production.
- ☞ Integrated weed management practices in vegetable production.
- ☞ Integrated nutrient management practices in vegetable production.
- ☞ Integrated pest management practices in vegetable production.
- ☞ IDM practices in vegetable production.
- ☞ Post harvest handling in different vegetable crops/recent trends/technologies in vegetable production.
